FOR IMMEDIATE RELEASE

### **Statement on David Mann's Latest Letter.**

WEST PRICE HILL, OH – This afternoon I received a letter from Mr. David Mann requesting that I sign a pledge that if elected Mayor, I “will not seek another office during the four-year term”. Through this letter, Mr. Mann is unfortunately showing numerous, very clear fatal flaws of poor leadership:

1. He is unaware that I have already committed to serving a full four-year term. See our YouTube video: [Full Four-Year Term Pledge | Najoli for Mayor - One Term Only - YouTube](#)
2. He is characteristically engaging in the same habit of shooting off private emails for support. He did this same thing less than two months back and I called him out on it. See our Mayoral Press Release #1 dated February 25, 2021. Mr. Mann clearly does not learn from mistakes.
3. He is requesting my signature on a document that is not dated. This is the same error he made last time! Like I said in February, “This is a noticeably big problem of a person failing to cross the t’s and dot the i’s. These are the types of issues that are rampant at City Hall which I will end as Mayor”.
4. He claims in the letter that he should be elected for the purpose of “mentoring the youngest, least experienced council in our community’s history”. Given what we saw last year with the indictments, Mr. Mann clearly failed to mentor younger council members over the past eight (8) years. Poor leaders fail to develop others. As an educator who facilitates adult learning and a sports coach who mentors others, I am best prepared to be the leader who will mentor others.

Friends, I have already made my pledge and will not sign Mr. Mann’s document. Mr. Mann as Mayor would be a recipe for disaster in Cincinnati. This is not the time to elect an individual who lacks clear vision and resists the truth that his performance has been mediocre. He does not have the enthusiasm to inspire our city to brighter days. Our city has a list of 26 critical issues that were identified in the Cincinnati Speaks Community Needs Survey in 2017. Mr. Mann has never addressed this, and I’m sure the study is gathering dust on a shelf in his office. It is time for a new direction.
